

NCL Purchases Two New Presses Which Provide Additional Capacity and Faster Turnaround for Customers

(November 10, 2011) – Waukesha, WI - NCL Graphic Specialties Inc, has purchased two Speedmaster XL 105-8 LX printing presses with CutStar in-line sheeting units and aqueous coaters, that will allow them to increase capacity and provide customers with cost savings and flexibility in short run as well as long run formats.

“Additionally the Prinect Inpress Control will further improve color quality and provide even faster turnaround times” states Richard Mueller, Chairman NCL Graphic Specialties.

The new installations, which will be completed in 2012, will allow NCL to handle a growing volume of cut and stack paper labels. NCL opened its second production facility in August 2011 in Menomonee Falls, WI.

Product lines include cut and stack, pressure sensitive, and roll fed prime packaging. The company currently produces more than 9 billion labels annually.

NCL has taken a position of leadership in the primary packaging industry and is committed to reinvestment in a vastly changing market place.

The company produces more than 200 million labels a week for a variety of industries including food processing and bottling. NCL also provides bindery, miniature folding, over wrap and custom printing services. For more information, visit www.nclgs.com.
